

# Financial Analyst

## Job Description

This position is responsible for the production and analysis of asset/liability management models, as well as the analysis of liquidity and capital adequacy for our national client base. Through the use of DCG's own BASIS (Balance Sheet Information System™) integrated software system, this individual will load client specific balance sheet, financial statement, and related information to generate complex statistical and financial forecasting models.

## Job Requirements/Skills

- A BS/BA in finance, accounting or economics, along with a minimum of 2-3 years financial modeling experience, is preferred, but not required.
- Proven analytical and problem solving skills.
- Curiosity about the banking industry and enjoy working with numbers.
- Effective time management and organizational skills.
- The ability to work well in a fast paced, detail oriented, deadline driven environment coordinating multiple projects simultaneously.
- A track record as a successful team player, yet be a self-motivated, results oriented individual.
- Working knowledge of PC, spreadsheet and database skills a plus.
- Strong verbal and written communication skills.
- Knowledge of bank products and services helpful.
